

A new way to hang out with friends!

[Get started](#)

What is poolr?

Poolr is a platform which lets you connect with friends and people you approve to offset costs of transport without losing comfort.

Our goal?

To offer a platform where customers get a better, cheaper, comfortable, effective and greener way to travel.

To offer drivers a better more effective way of controlling your rides.

What poolr solves

It is estimated that the economic cost of congestion is approximately 1.9 billion annually.

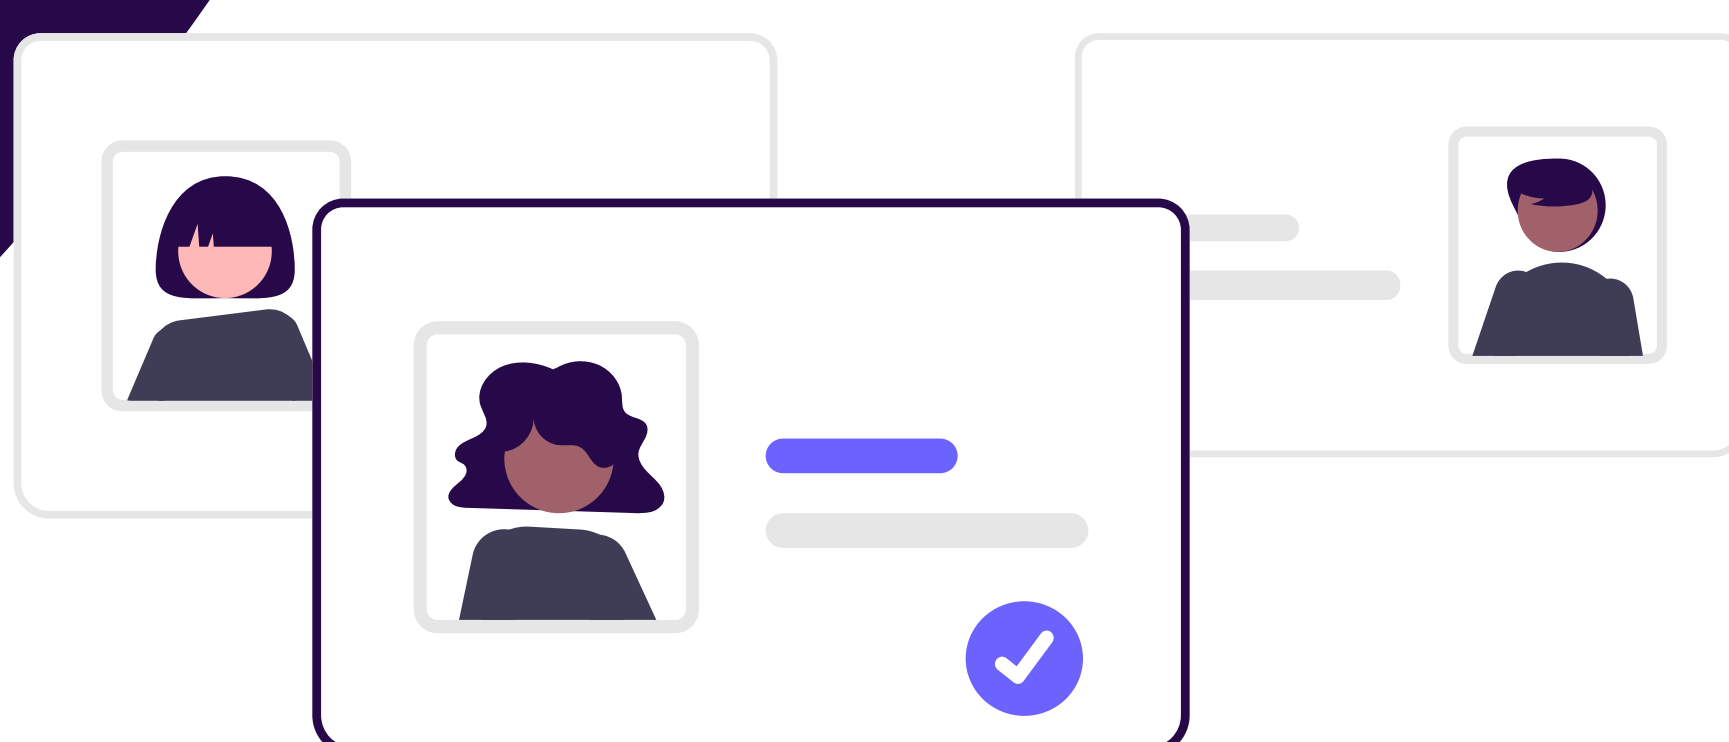

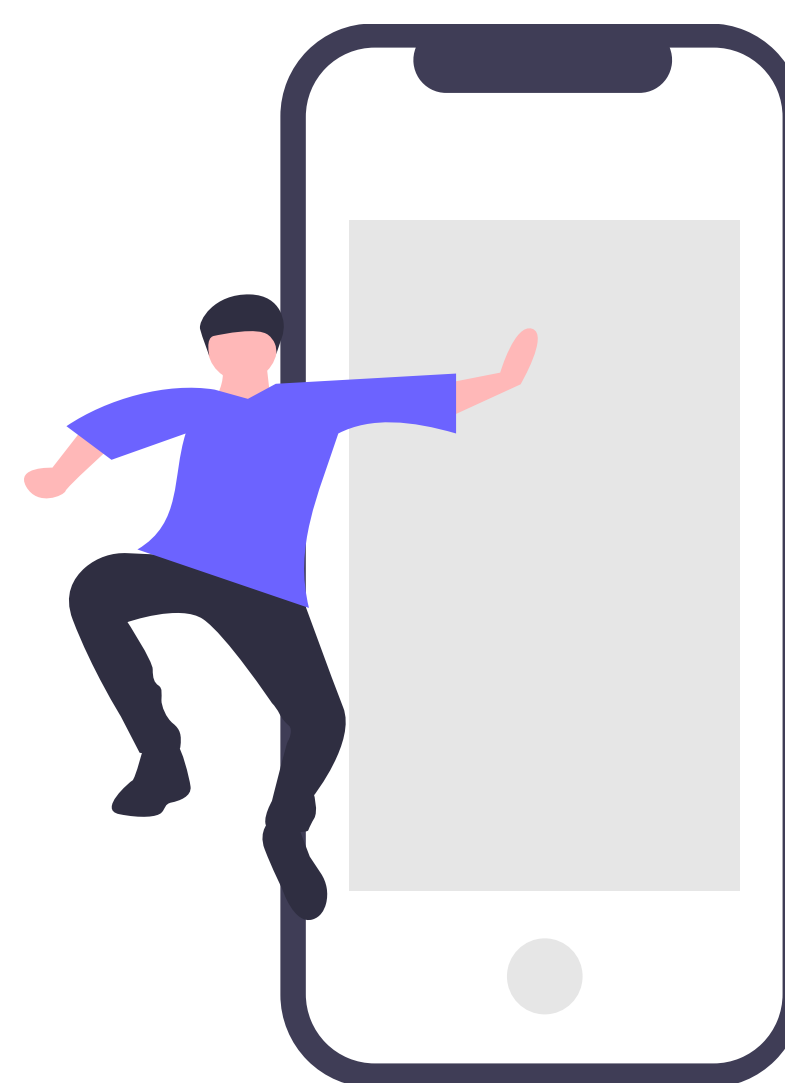

Taxi services are often very costly to use hence using them as a day to day form of transport is expensive.

Matatus offer their own hassle of frequent congestion, waiting times and discomfort.

Need for you to register as a PSV to carry passengers
